artificial crowd noises akin to a laughing track in your favourite sitcom, but which required a lot more tech to make. Virtual fans who tuned into the broadcast were also greeted with innovations that required some of IBM's best minds in India to develop.

Following the sudden decision to go ahead with the US Open without any spectators, IBM had only 12 weeks to quickly develop new experiences. One of these was the Match Insights feature.

Karthik Sankaranarayanan, senior manager of AI for Interaction at IBM Research India, says this feature is powered by the deep learning-based Natural Language Generation (NLG) technology that has been incubated and developed by research scientists in IBM's Delhi and Bengaluru centres over the past few years.

At the US Open, IBM Watson Discovery's NLG capability will go through the massive amounts of statistical tennis data available online – about players, games, tournaments, etc – and automatically generate insights for fans to read. IBM Watson is the company's famous computerised 'brain,' while Watson Discovery is its enterprise AI technology.

Statistical data can be overwhelming for most people to interpret and understand. NLG technology is able to wade through vast amounts of data, identify patterns, correlations, and anomalies hidden there, and communicate only the most insightful aspects in plain, easy to understand language. "And in a way that is quite indistinguishable from what a human author would do," says Sankaranarayanan.

He says that while most Natural Language Processing (NLP) has traditionally focused on how to make sense out of language data that is inputted to a machine, by what is called Natural Language Understanding (or NLU), NLG focuses on the complementary challenge – how does a machine produce or generate written text in natural language from tables, graphs, charts or other forms of data.

The company used its hybrid cloud architecture with Red Hat OpenShift to power Watson's advanced natural language processing tech. "The scientific results of the work done out of India like NLG have been accepted and published at prestigious AI venues such as Association of Computational Linguistics, the world's leading AI conference in Natural Language Processing," says Sankaranarayanan.

[Move To Top](#)

The India team also collaborated with the company's global research teams to create the cheering sounds. "A completely silent stadium wouldn't be that engaging. We had to use AI to go through hundreds and hundreds of hours of tennis matches to generate the right kind of sounds to make the experience more realistic for people watching online," Sankaranarayanan says.

IBM believes NLG is the next frontier in the evolution of AI for human-machine interaction. "Our tech is now able to even engage in debate. The computer can take a topic, create an argument and counter-arguments. We like to call it conversational AI, the way humans interact, which requires the computer to understand context and intent to push the conversation forward," says Gargi Dasgupta, director of IBM Research India and CTO of IBM India.

forward, pushing the boundaries of the PC category and realizing Samsung's vision of AI innovation for today and tomorrow.

Let's delve into the unique features of each variant.

[View More >](#)

[Move To Top](#)

Galaxy Book4 Pro 360—where artistry meets intelligence

Unleash your creative vision on the stunning 40.62cm (16") Dynamic AMOLED 2X display, where vibrant colours and sharp details come to life. Experience smooth scrolling, onscreen motion, and reduced blue light emission for eye comfort. The [Galaxy Book4 Pro 360](#) features a responsive touchscreen and the versatile S Pen, offering an intuitive canvas for your artistic endeavours. Whether you prefer using your fingertips or the included S Pen, tap into your creativity effortlessly.

Explore the power of the lightning-fast Intel® Core™ Ultra processor, backed by advanced NPU for smart AI performance. The FHD wide-

angle webcam and studio-quality mics, equipped with AI noise cancelling, ensure clear visuals and crisp sound. Auto Framing and eye contact correction in Studio effects refine your appearance for video calls, presenting your best self.

Galaxy Book4 360—Powerhouse performance on the go

Immerse yourself in the cinematic splendour of Galaxy Book4 360's 39.62cm (15.6") Super AMOLED display, where vibrant colors and rapid response transform your gaming and streaming experience into an edge-of-your-seat spectacle. With reduced blue light emission, enjoy the entertainment with extra eye care. Opt for touchscreen convenience when the keyboard feels mundane, navigating effortlessly with intuitive multi-touch gestures on the Galaxy Book4 360's responsive display. Flip the screen and unleash your creativity with the S Pen, sketching, noting ideas, or fine-tuning your masterpieces with precision.

Powered by the next-gen Intel® Core™ 7 / 5 processor and robust Intel® graphics, this ultra-thin laptop seamlessly balances peak performance for work and play. Speed through tasks and switch to action-packed gaming for the ultimate unwinding experience.. And don't forget your AI photo editing ally, Photo Remaster, ready to enhance your visual creations.

Galaxy Book4 Pro—Touch, create, conquer

Present your innovative ideas on the stunning 35.56cm (14") or 40.62cm (16") display, showcasing content in high resolution with vibrant colours, smooth scrolling, and reduced blue light for eye comfort. Experience enhanced productivity with the new touchscreen

on the [Galaxy Book4 Pro](#), allowing seamless navigation with just the touch of your finger. Empower your tasks with the next-gen Intel® Core™ Ultra processor, featuring an advanced NPU for super-fast and smooth AI-powered performance. Multitask effortlessly with professional-level apps and conquer demanding projects with ease.

Elevate your video calls with the Galaxy Book4 Pro's 1080p FHD webcam and AI features like eye contact correction and Auto Framing in Studio effects for a polished appearance. With the launch of the Galaxy Book4 series, Samsung has once again demonstrated its commitment to innovation and user-centric design.

With models tailored to different needs, whether it be versatility, high performance, or cutting-edge features, the Galaxy Book4 Series offer a comprehensive range of options for consumers. As the tech giant ushers in this new era of intelligent productivity, users can expect a computing experience that sets the stage for a smarter and more efficient future.

If a customer adds Rs 2,000 or Rs 5,000 to their Apple ID balance then they will receive a 10% bonus. For instance:

- On adding Rs 2,000, the customer gets extra Rs 200.
- On adding Rs 5,000, the customer gets extra Rs 400.

What Can This Bonus Be Used For?

This bonus from Apple can be used for a lot of things! Customers can purchase apps and games from the App Store, or can subscribe to services like Apple Music. This way one can get more out of their Apple IDs.

Also read | [IPL Cricket 2024 in United States: Where and How to watch IPL Matches 2024 Live in USA](#)

How to Get the Apple ID Bonus?

Customers can get the bonus through two ways:

- Open Settings on your Apple device - iPhone or iPad. Now tap the option "Your Name" and further go to "Payment and Shipping". Further, select the option "Apple ID" and tap "Add Funds" to get the offer.
- The other way is, open the App Store on your iPhone or iPad, and tap on your Account icon. Now, tap the option "Add Funds to Apple ID" and get the bonus.

Important Things to Remember

- The offer lasts till March 26, 2024.
- The bonus can be availed only once. Hence, make sure to add enough funds to get the most out of the deal.
- Eligibility to avail the offer depends on your account information or purchase history.

What Can You Do with Your Apple ID Balance?

The money added in your Apple ID can be used for various things. You can purchase apps and games, subscribe to services like Apple Music and even get extra iCloud storage. It is the best and convenient way to manage your purchases and subscriptions all in one place.

So, all the Apple users in India must not miss out on this offer and enjoy the 10% bonus.

OnePlus Nord CE 4: Price in India (Expected)

The OnePlus Nord CE 4 is rumoured to be available in India under Rs 30,000. Till date there is no leak on the price part or any confirmation from the company but considering that the OnePlus

Nord CE 3 was launched at a starting price of Rs 26,999, its successor might be priced similarly or slightly higher.

[Move To Top](#)

OnePlus Nord CE 4 Specifications

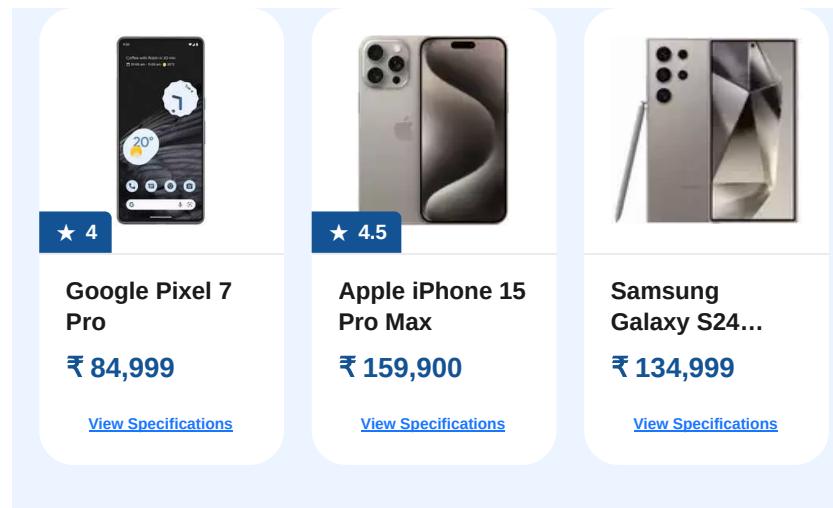

- OnePlus Nord CE 4 will be equipped with a Qualcomm Snapdragon 7 Gen 3 chip for enhanced performance.
- The rear camera setup on OnePlus Nord CE 4 will include two or three cameras, with a new design featuring three modules. The phone will have a sleek profile with flush camera modules, minimising protrusion.
- Upcoming OnePlus phone will be available in two colour options: Dark Chrome and Celadon Marble, inspired by the OnePlus 11 Marble Odyssey.
- It is expected that the OnePlus Nord CE 4 will include a 6.7-inch AMOLED screen, a 50 MP primary camera, and an 8 MP secondary sensor, along with a 16 MP camera on the front for selfies and video calls.

Vivo T3 launch date and price

Soon launching in India on March 21, the Vivo T3 smartphone will be available in two storage variants: 8GB RAM + 128GB internal storage and 8GB RAM + 128GB internal storage that will be priced at Rs 18,999 and Rs 21,990, respectively.

Also read | [IPL Cricket 2024 in United States: Where and How to watch IPL Matches 2024 Live in USA](#)

Vivo T3 5G availability and Colour options

The smartphone will be exclusively available via Flipkart. Moreover, the handset will be available in crystal flake and cosmic blue hues colour options.

Vivo T3 Specifications (Expected)

The Vivo T3 smartphone is speculated to be available with impressive features and specifications. Here is what you can expect from the upcoming Vivo 5G smartphone:

- **Display:** Vivo T3 5G is expected to feature a 6.67-inch FHD+ AMOLED screen with a 120Hz refresh rate and up to 1800 nits of brightness.
- **Processor:** The Vivo smartphone will be equipped with a MediaTek Dimensity 7200 SoC.
- **RAM and Storage:** The phone will be available in two storage variants: 128GB or 256GB internal storage.
- **Camera:** The mobile is touted to have a triple camera setup on the rear including a 50 MP Sony IMX882 main camera, OIS support, and a 16MP camera on the front for video calls and selfies.
- **Battery:** Vivo T3 5G is speculated to house a 5000mAh battery with 44W FlashCharge support for fast charging.
- **Other features:** The upcoming mobile is rumoured to include dual stereo speakers, 1TB expansion storage via microSD card, IP54 dust and water resistance, and compatibility with 10 5G bands.
